Innovative design of I-Flex™ Heated Lip produces blown film with excellent gauge

- reduces heat migration between zones for precise control
- extends dwell time
- yields optimal control at elevated rates
- uses a PC-based system
- controls the heaters' on-off cycle with PLC to ensure consistent heat to each zone.

The robust user-interface can be run on a stand-alone computer or integrated with BE's *ITALYCS*®4 software. The software provides effective statistical trending and graphic display capabilities.
